

Muhammet Fatih Özata

Software Developer (Mobile & Backend)

muhammetfatihozata7@gmail.com — +90 507 513 18 76 — Antalya, Turkey
Portfolio — GitHub — Medium

Open to remote roles and relocation within Europe

PROFESSIONAL SUMMARY

Software Developer with experience in building **event-driven backend systems** and **mobile applications** across the travel and B2B e-commerce domains. Focused on designing **CQRS-based microservices** and asynchronous workflows using **.NET and Azure**, while delivering maintainable solutions aligned with real-world business processes.

TECHNICAL SKILLS

- **Languages & Frameworks:** C#, .NET 8, ASP.NET Core, TypeScript, JavaScript, Vue.js, React Native
- **Mobile Development:** Expo (Multi-brand), Zustand, NativeWind, i18next, SecureStore, Axios Interceptors
- **Backend & Architecture:** Microservices, CQRS, MediatR, Event-Driven Architecture, REST APIs, Fastify (Plugin Architecture)
- **Databases & Messaging:** MSSQL (Stored Procedures), MongoDB, Redis, Dapper, Entity Framework Core, Azure Service Bus
- **DevOps & Monitoring:** Azure DevOps (CI/CD), Docker, Application Insights, Swagger, Jira

PROFESSIONAL EXPERIENCE

Software Developer

Corendon Group

Sep 2023 – Present

Antalya, Turkey

- **Mobile Application Development (React Native / Expo):**
 - Worked on a **multi-brand mobile architecture**, maintaining multiple applications from a shared codebase using Expo.
 - Implemented **OAuth2-based authentication flows** on the mobile side, focusing on secure token handling, refresh mechanisms, and client-side authorization practices.
 - Developed push notification workflows using **Expo Notifications**, supporting deep linking and real-time user interactions.
 - Implemented **internationalization (i18n)** with automatic locale detection and dynamic language switching.
 - Created reusable **custom React Hooks** to encapsulate business logic and state management.
- **Backend & Event-Driven Platform Engineering (.NET / Azure):**
 - Designed and implemented **CQRS-based microservices** using **MediatR** for a B2B e-commerce platform, separating command and query responsibilities.
 - Built **event-driven and asynchronous workflows** using **Azure Service Bus (Queues and Topics)** to support reliable inter-service communication.
 - Developed **Azure Functions** with **HTTP, Queue, and Timer triggers** to process order lifecycle events, scheduled cancellations, and time-based business rules.
 - Integrated **SQL-based persistence** with message-driven processing, enabling database changes and incoming events to trigger downstream workflows.
 - Improved operational reliability by handling retries, background execution, and message-based processing across distributed services.
- **Airline Domain Integrations (NDC):**
 - Contributed to **IATA NDC (New Distribution Capability)** integrations, working with XML-based request and response flows for real-time flight availability and booking operations.

EDUCATION

B.Sc. in Computer Engineering (Full Scholarship)

Antalya Bilim University

2018 – 2023

Antalya, Turkey

LANGUAGES

- **English:** B2 (Professional Working Proficiency)
- **Turkish:** Native
